

Steps for Creating Package Using MSIX Packaging Tool

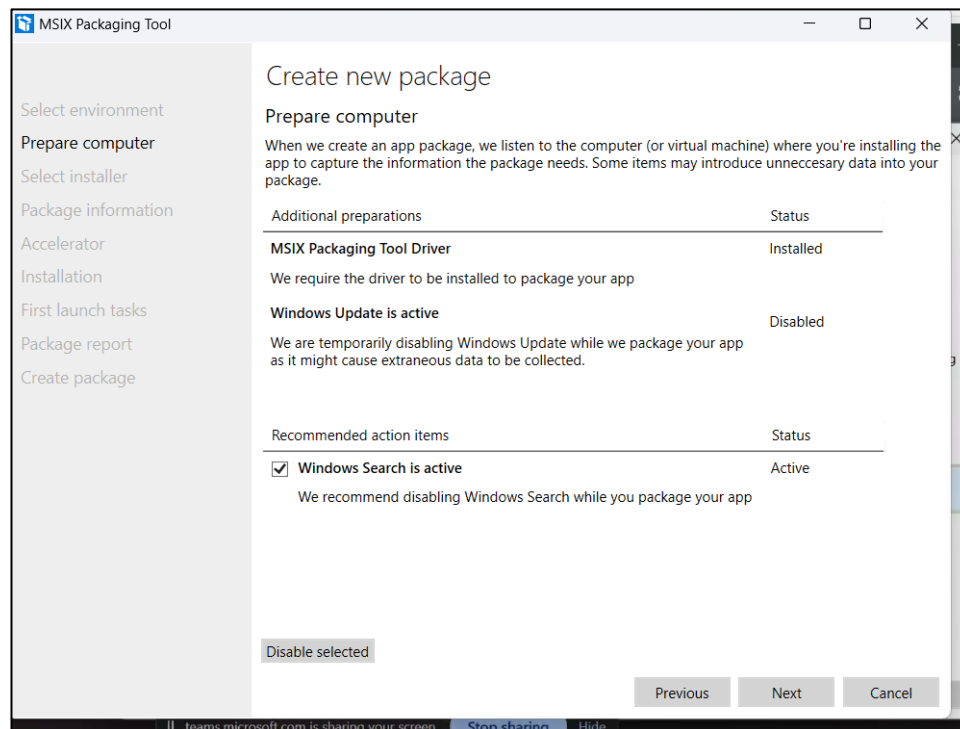

Step 1: Download the MSIX Packaging Tool from Microsoft Store then Select Create your app package

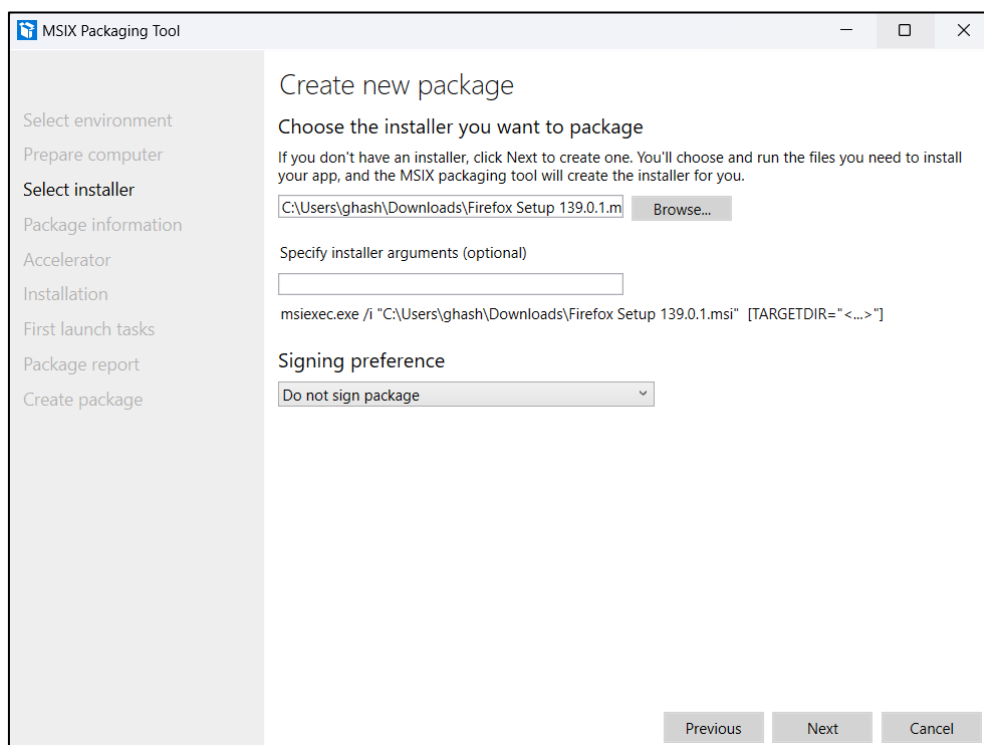

Step 2: Select Create package on this computer -> Next

Step 3: In Prepare Computer: It will take some time for checking the driver status once its installed then **click on check box** -> Next

Step 4: In Select Installer -> Browse the .msi file and in Signing Preference select Do not sign package -> Next

Step 5: In **Package information**-> in **Publisher name*** textbox give **CN=** at the start and then click on the **checkbox** after that select **Windows 10 2016 LTSP** from the dropdown-> Next

The screenshot shows the 'MSIX Packaging Tool' window with the 'Create new package' title. The left sidebar lists steps: Select environment, Prepare computer, Select installer, Package information (selected), Accelerator, Installation, First launch tasks, Package report, and Create package. The main area is titled 'Package information' and contains the following fields and options:

- Package name ***: MozillaFirefox139.0.1x64en-US
- Package display name ***: Mozilla Firefox 139.0.1 x64 en-US
- Publisher name ***: CN=Mozilla
- Publisher display name ***: Mozilla
- Version ***: 139 . 0 . 1 . 0
- Package Description**: Mozilla Firefox 139.0.1 x64 en-US
- Installation location**: C:\Users\ghash\Downloads\FireFox_msi (with a 'Browse...' button)
- ☒ Add support for MSIX Core to this package. See <https://aka.ms/MSIXCore> to learn more.
- Windows Version for MSIX Core support**: Windows 10 2016 LTSP (1607) (10.0.14393.0) (dropdown menu)
- Once you continue to the next page, installation will begin and you will not be able to return.

At the bottom right are 'Previous', 'Next', and 'Cancel' buttons.

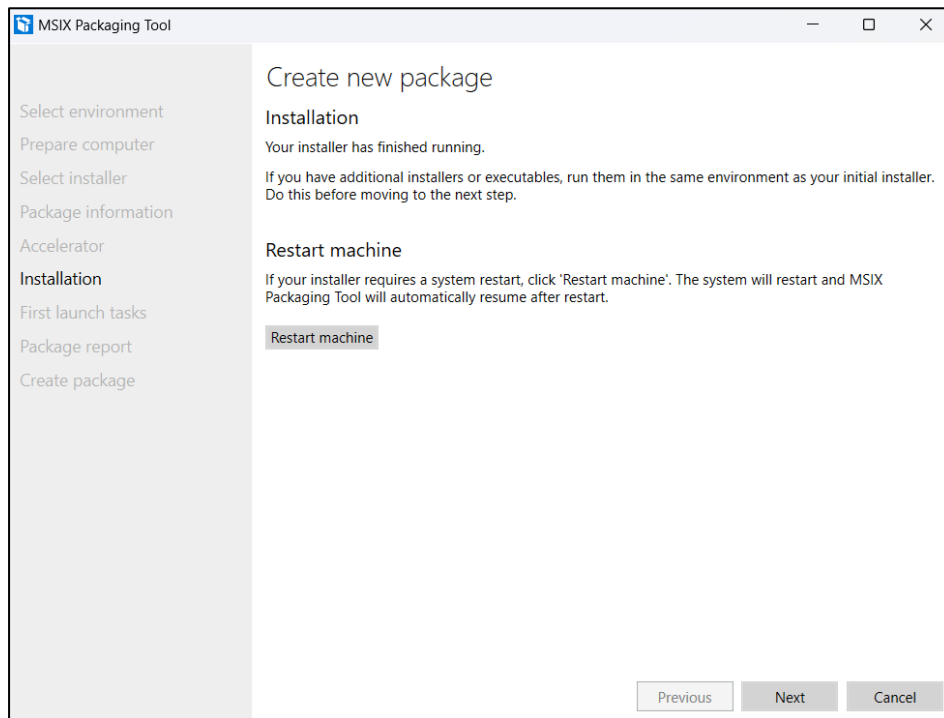

Step 6: In **Acceleration** -> DO Nothing -> Next

The screenshot shows the 'MSIX Packaging Tool' window with the 'Create new package' title. The left sidebar lists steps: Select environment, Prepare computer, Select installer, Package information, Accelerator (selected), Installation, First launch tasks, Package report, and Create package. The main area is titled 'Choose the Accelerator for applying to the package' and contains the following elements:

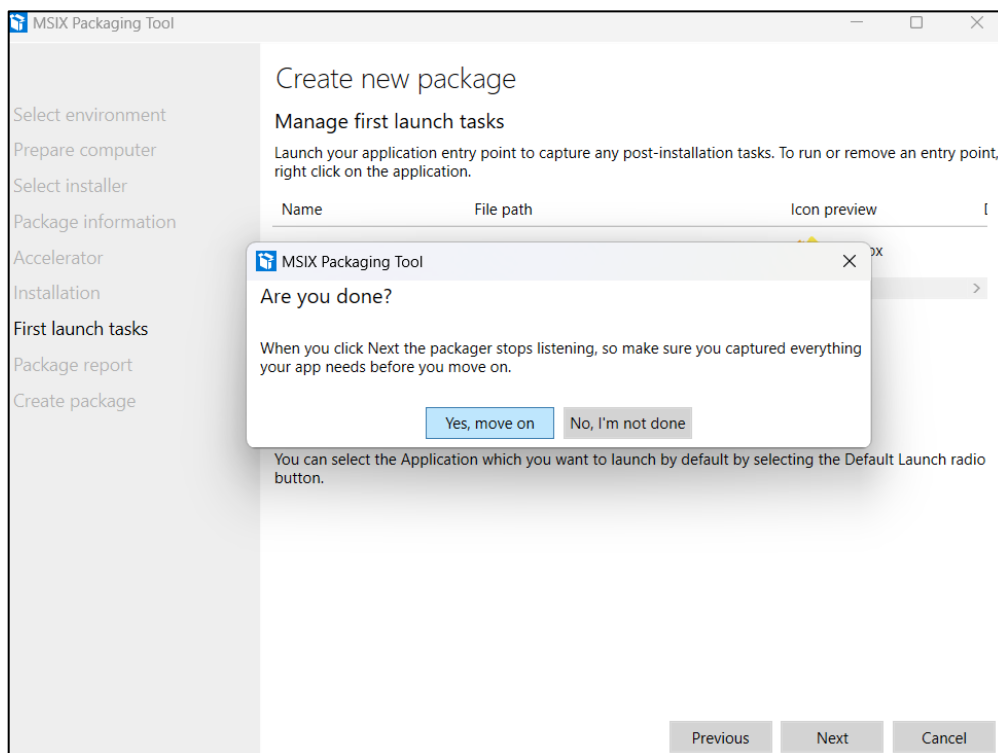

- If you don't have an Accelerator, click Next to proceed with conversion.
- A text input field for the accelerator path, with a 'Browse...' button.
- Sample Conversion Accelerators [here](#).

At the bottom right are 'Previous', 'Next', and 'Cancel' buttons.

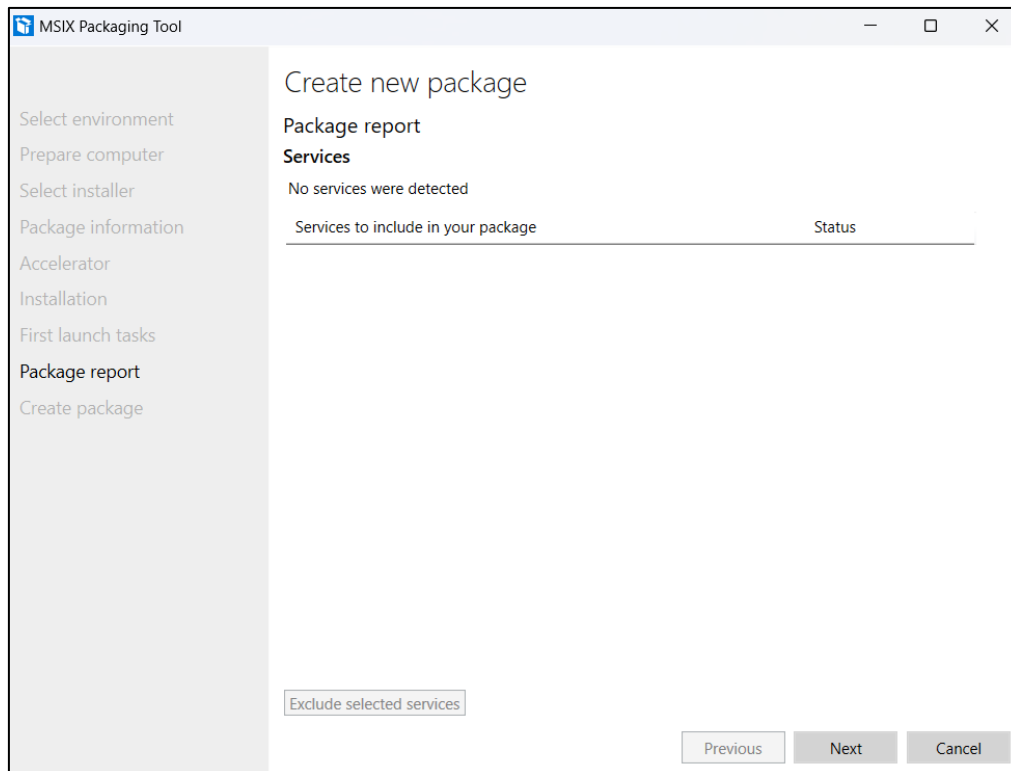

Step 7: In **Installation**-> Next
